

SECURITY - COMFORT - ENTERTAINMENT

Solutions for an intelligent home

„Experience the magic!“

„As one of Germany's leading SmartHome service providers, we plan and implement challenging projects in the field of intelligent living. We combine the latest products from the world of SmartHomes to adapt your home exactly to your needs.

From high-end security systems to tailor-made entertainment systems, we develop technical lifestyle solutions that make our customers' lives even more pleasant. Protection, comfort and entertainment are our core themes.“

Boris Rupnik - CEO

Today there are many intelligent devices on the market: televisions, thermostats, Door locks - even light bulbs - can be controlled via smartphones. These devices all work fine separately, but when used together, the true harmony of this technological symphony really comes to the fore.

on-Home literally coordinates all networked devices in your home, creating individual, personal comfort with technical solutions for maximum security, comfort and enter-

tainment. on-Home works with the world's leading brands to make it easy to integrate your existing products and update and adapt your home to changing current and future needs.

Welcome to a smarter home experience. We call this „Experience the magic!“.

- ✓ PROTECTION AND SAFETY
- ✓ COMFORT AND QUALITY OF LIFE
- ✓ ENTERTAINMENT
- ✓ INTELLIGENT LIGHTING

„Simply Living 2.0“

The on-Home DIGITAL CONCIERGE enables you to centrally control your light, alarm system, air conditioning, heating, audio and video equipment and much more - even by voice control.

Your home recognises when you come home and programmed sequences are started automatically. Even the safety technology is a fixed part of your system. Systems that you can access at any time and from anywhere.

Welcome to your new home!

DIGITAL CONCIERGE

Everything centrally controlled

- + CAMERAS
- + MOTION DETECTOR
- + DOOR PHONES
- + SENSORS
- + WINDOWS AND SHUTTERS
- + HOUSE TECHNOLOGY
- + ALARM SYSTEM
- + LIGHT CONTROL
- + SMOKE DETECTOR
- + FLOOD DETECTOR
- + MEDICAL DEVICES

„Safe and comfortable“

The on-Home DIGITAL CONCIERGE is your control centre for security in your home. Your existing technical infrastructure can be reliably integrated into the system so that you can control „everything“ centrally - whether you are at home or on the road via smartphone or other terminal devices. Wherever you are - your home is always with you.

ALL BRANDS - ONE REMOTE CONTROL

Control your existing or new multimedia devices with just one remote control or a single app on your smartphone, tablet or our Smart-Touch remote control.

With the on-Home DIGITAL CONCIERGE you can control all manufacturers.

„One system for everything“

- + Consumption values
- + Home Speaking Functions
- + and much more

„Let the music play“

Enjoy your music and multimedia devices also on your terrace or in your garden. Invisible external loudspeakers and stylish design loudspeakers ensure a special sound experience outdoors.

Whether you want an outdoor cinema or simply want to enjoy music outdoors - the on-Home planning team will find the right product for you!

„Planning and realization“

Planning, controlling and organizing: on-Home offers you professional support in all phases of your project.

1. CONSULTATION

- + security concept
- + SmartHome integration (home control)
- + Audio, TV and Multimedia Integration
- + Lighting design

2. PLANNING

- + Development of individual technical solutions
- + Alarm systems and camera surveillance
- + Audio, TV and home cinema systems
- + Lighting and darkening systems

3. IMPLEMENTATION

- + Project management and coordination
- + Implementation monitoring
- + Service and maintenance

„Smart design solutions“

The planning team of on-Home supports you with tailor-made technical solutions to ideally adapt your home to your needs and to integrate your technology discreetly hidden or clearly visible in your home. For example, hidden displays, projectors or screens can be automatically exposed, curtains can be automatically moved, fountains or gas fireplaces can be switched on and invisibly installed loudspeakers ensure good sound. on-Home professionally implements tailor-made technical solutions for you and networks them with your DIGITAL CONCIERGE. Technically, there are no limits to your imagination and many solutions can even be easily retrofitted.

„Unique and exceptional“

Full service is our standard. As project planners, we reliably control and accompany all project phases and cooperate with a selected circle of project partners from various disciplines. Quality is our top priority. High-performance project partners from all fields follow our quality standards and ensure that our products are processed on time and to a highest standards.

„What you see is what you get“

In addition to the integration of technical solutions of all kinds, on-Home realises planning of lighting and develops unique interior design concepts. With the help of moodful 3D visualizations we present our planning results in an easily understandable way.

Inspiration Conception Realization

Do you know the DESIGN.SMART.HOME exhibitions yet? In our exhibitions for extraordinary living ideas you can be inspired with all your senses. We look forward to your visit!

DESIGN.SMART.HOME was founded by Boris Rupnik, CEO of on-Home. About 20 leading companies in their industry work together in a proven partnership to realize projects of any size with a consistently high quality standard.
